AIIMS

Press release 3rd September 2014

Progressive hospitals and healthcare providers across the country have been working towards introducing structural changes and processes to transform themselves into an integrated end-to-end acute and chronic care service delivery organizations. AIIMS, Delhi has been undergoing a quiet revolution over the last one year in bringing innovative and patient oriented services so as to cater to the huge number of patients who look up to AIIMS for the final word in affordable and quality healthcare

Prof MC Misra, Director AIIMS, Delhi said that AIIMS has been catering to an ever increasing patient volume and although the statistics seem overwhelming, a lot can be done to improve patient care as well as to bring satisfaction amongst both the patients and care givers. Prof Misra also said"You may remember how the railways and banking industry reinvented themselves in India using computerisation in the 1990's. I firmly believe that by leveraging this patient 'load', computerisation can similarly bring a turnaround in patient care at AIIMS besides revolutionizing research and education activities".

To showcase the IT innovations implemented at AIIMS, department of IT is organizing the 4th International Conference & Workshop on "Cost Effective Use of Technology in E- Healthcare" at AIIMS, New Delhi from 4- 6th September 2014. DrJitendra Singh, Minister of State for Science and Technology (Independent charge) will be the chief guest and will be inaugurating the Patient display system (PDS) installed in AIIMS emergency department, Live patient statistics Display (LPSD) at AIIMS Trauma center website and the IVR based appointment system for OPD appointments on 4th September 2014 at 12:30pm

Write up each of these innovations are appended
