

Qubit 4.0 Fluorometer (Invitrogen)

Applications:

- Assessment of the concentration of
 - DNA
 - RNA
 - Protein
- Assessment of RNA integrity

For details, please see (<https://www.thermofisher.com/in/en/home/industrial/spectroscopy-elemental-isotope-analysis/molecular-spectroscopy/fluorometers/qubit/qubit-fluorometer.html>)

- **As of now, the kits are available for assessment of quantity of gDNA, NGS libraries and total RNA. For applications other than these, the users can submit a request to the committee.**
