

ALL INDIA INSTITUTE OF MEDICAL SCIENCES
DR. BRA INSTITUTE OF ROTARY CANCER HOSPITAL
ANSARI NAGAR, DELHI-110029

Date: 13.04.2023

Subject: Proposal for procurement of Wound Protectors & Gel Port for Dept. Of Surgical Oncology at Dr. BRA IRCH, AIIMS New Delhi-110029 on PAC basis and invitation of comments/objections against such consumables if any, thereof.

Dr. BRA Institute of Rotary Cancer Hospital, Delhi is in the process of procuring of **Wound Protectors & Gel Port** for performing various surgeries at operation theatres at Dept. of Surgical Oncology.

Therefore, this document is being uploaded for open information to all principal manufacturers or their authorized distributor with the intention to invite comments and/or objections with regards to the proprietary nature of the aforesaid product if any.

The comments/objections if any should be received in the office of the **Stores Officer Room no.18, Ground Floor, Dr. BRA IRCH, AIIMS, Ansari Nagar, Delhi – 110029** within 15 days of issue of this letter with contact details, failing which it will be presumed that no other bidder/ manufacturer/vendor is having any comments/objection against the proposition and the case will be decided purely on merit.

Stores Officer,
Dr. BRA IRCH

Enclosures:

- Proprietary Article Certificate from Principal Firm,
- PAC duly signed by the user dept.
- Quotation from distributor.
- Ref. supply orders for price justification.
- Fall clause certificate.
- Undertaking of non-availability on Gem portal.
- Undertaking for non-blacklisting/debarment.
- OEM authorisation certificate.

ALL INDIA INSTITUTE OF MEDICAL SCIENCES
Dr. B.R.A.I.R.C.H ANSARI NAGAR, NEW DELHI-110029
PROPRIETARY/SPECIFIC BRAND GOODS CERTIFICATE

1.	Item /Type/Model No. required along with specification	1. Wound protector (2-4cm) – 20 pec. 2. Wound protector (2.5-6cm) – 20 pec. 3. Wound protector (5-9cm) – 15 pec. 4. Gel Port – 05 pec.
2.	Is the item a spare part attachment or accessory for an existing equipment	NO
3.	Name of the manufactures/supplier of the item proposed by the indenter	Manufacturer – M/s Applied Medical Supplier – M/s SARA Enterprises
4.	Are the sole manufactures/sole distributors of the item	YES
5.	Is there any other item with similar/equipment specification available in the market to meet the job requirement envisaged. If the answer is yes, why the same can't be procured.	PROPRIETARY ITEM (These items are specifically manufactured by "Applied Medical, USA")
6.	What were the efforts made to locate alternative source of supply or use other substitutes	Checked Online & Offline (GAR report attached)
7.	Why open/limited tender can't be resorted to, for locating alternative source.	Proprietary Item
8.	Are the proprietary items certifying that the rates are reasonable or not	Yes, May Negotiate
9.	Any other justification for procuring item for single source.	Proprietary item of M/s Applied Medical (22872 Avenida Empresa, Rancho Santo Margarita, CA 92688)

Note: As the item mentioned is of regular use i.e. processed for One-Time Purchase and rates may be fixed as per User Deptt. (if approved)

I certify that the item at Sr. no. 1-4 above is required to be procured on single tender basis as the source of supply is definitely known/the specified brand proposed was advert ages is meeting our functional requirement and limited tender system could be dispensed with as they would serve no useful purpose in the particular case.

IS ALEXIS® PART OF YOUR STANDARD OF CARE?

1. Reid K, et al. Barrier Wound Protection Decreases Surgical Site Infection in Open Elective Colorectal Surgery: A Randomized Clinical Trial. *Dis Colon Rectum*. 2010 Oct; 53(10): 1374-1380.
2. Lee F, et al. Use of Wound Protection System and Postoperative Wound Infection Rates in Open Appendectomy. *Arch Surg*. 2009 Sep; 144(9): 872-875.
3. Horiuchi T, et al. Randomized Controlled Investigation of the Anti-Infective Properties of the Alexis Retractor/Protector of Incision Sites. *J Trauma*. 2007 Jan; 62(1): 212-215.

*RRR (relative risk reduction) was defined as the proportion of the control group (standard retractors) experiencing a given outcome minus the proportion of the treatment group (Alexis protector) experiencing the outcome, divided by the proportion of the control group (standard retractors) experiencing the outcome.

Provides 360° Protection

- Maintains moisture at the incision site
- Allows visualization of wound margins

Provides 360° Atraumatic Circumferential Retraction

- Distributes force evenly for optimal field of view
- Allows for maximum exposure with a minimum incision size
- Provides unparalleled exposure without trauma associated with prolonged point retraction

Offers Ultimate Versatility

- Multiple sizes accommodate a wide range of surgeries
- Unique design facilitates rapid and effortless setup

Clinical Evidence

Supporting the use of the Alexis® wound protector/retractor

20

"Impervious plastic wound protectors reduce the risk of SSI when employed in non-trauma-related gastrointestinal and biliary tract surgery. Wound protectors represent a safe and simple intervention that may reduce postoperative morbidity and mortality."
...

"There was a nonsignificant trend toward greater protective effect in studies using a dual ring protector (RR = 0.31, 95% CI 0.14-0.67, P = 0.003), rather than a single ring protector (RR = 0.83, 95% CI 0.38-1.83, P = 0.64)."

Edwards J. P., et al. Wound Protectors Reduce Surgical Site Infection: A Meta-Analysis of Randomized Controlled Trials. *Ann Surg.* 2012 Jul; 256(1): 53-59.

"Superficial incisional SSI was significantly diminished in the ALEXIS wound retractor group (P=0.006)."
...

"The ALEXIS wound retractor is more effective in preventing SSI in elective colorectal resections compared with conventional methods."

Cheng K. P., et al. ALEXIS O-Ring wound retractor vs conventional wound protection for the prevention of surgical site infections in colorectal resections. *Colorectal Dis.* 2012 Jun; 14(6): 346-351.

"[E]nteric organisms were cultured twice as often from the inside surface of the retractor compared with the outside surface of the retractor (49% vs 26%, respectively; P < 0.0001)."
...

"[U]se of a plastic wound retractor may result in reduced enteric bacterial colonization of the surgical incision site during gastrointestinal surgery. Reduced colonization of the surgical incision site by enteric bacteria due to the use of a plastic wound retractor should result in a reduction in SSI following gastrointestinal surgery."

Mohan H. M., et al. Plastic wound retractors as bacteriological barriers in gastrointestinal surgery: a prospective multi-institutional trial. *J Hosp Infect.* 2012 Jun; 81(2): 109-113. Epub 2012 May 11.

"Laparoscopic colon and rectal resection using a clean and dirty technique, with sterile specimen extraction, re-gowning procedure and wound protection have proven to reduce the incidence of wound infections, for an overall SSI rate of 5.1% compared to previously reported rates of up to 30%."

Nassif G., et al. Wound Infection After Colorectal Surgery In The Laparoscopic Era. SAGES Poster Session 2012.

"Only the use of a wound protector was found to significantly reduce the risk of wound infections in an adjusted analysis."

Lee K.-W., et al. Use of an Upper Midline Incision for Living Donor Partial Hepatectomy: A Series of 143 Consecutive Cases. *Liver Transpl.* 2011 Aug; 17(8): 969-975.

"These results suggest that the [wound protector] protects an incision site from bacterial invasion."
...

"[W]e consider that the low incidence of SSI may have resulted from the protective effects of the [wound protector]."

Horiuchi T., et al. A Wound Protector Shields Incision Sites from Bacterial Invasion. *Surg Infect (Larchmt).* 2010 Dec; 11(6): 501-503. Epub 2010 Sep.

"In this study the use of barrier wound protection in elective open colorectal resectional surgery resulted in a clinically significant reduction in incisional surgical site infections."

...

"There was a significant reduction in the incidence of incisional surgical site infections when the wound protector was used: 3 of 64 (4.7%) vs 15 of 66 (22.7%)."

Reid K, et al. Barrier Wound Protection Decreases Surgical Site Infection in Open Elective Colorectal Surgery: A Randomized Clinical Trial. Dis Colon Rectum. 2010 Oct; 53(10): 1374-1380.

"Our data demonstrate that a statistically significant reduction in the incidence of wound infection was achieved with the use of a wound-protection device. This device provides a simple intervention that may eventually have a large impact on the incidence of surgical wound infection and therefore annual health care expenditures."

Lee P, et al. Use of Wound-Protection System and Postoperative Wound-Infection Rates in Open Appendectomy. Arch Surg. 2009 Sep; 144(9): 872-875.

"The wound infection rate of the [left upper quadrant] trocar site was significantly decreased when utilizing the wound retractor (18% to 0%)."

Nunn A, et al. A Novel Approach to Preventing Wound Infections in Laparoscopic Roux-En-Y Gastric Bypass Patients. SAGES Poster Session 2008.

"We found that the wound retractor/protector prevented the incision site from drying, decreased tissue damage, and facilitated the migration of neutrophils, suggesting a preventive effect of the device with respect to wound infection."

...

"The studied wound retractor/protector effectively protects wound tissue from damage due to environmental factors experienced during surgery."

Horiuchi T, et al. A wound retractor/protector can prevent infection by keeping tissue moist and preventing tissue damage at incision sites. Helix Review Series: Infectious Diseases. 2007; 3: 17-23.

"The results of this study demonstrate that wound infection decreased significantly in the With Alexis retractor group."

...

"It was suggested that the use of the Alexis wound retractor would protect surgical wounds from contamination by bacteria and thus prevent infection."

Horiuchi T, et al. Randomized Controlled Investigation of the Anti-Infective Properties of the Alexis Retractor/Protector of Incision Sites. J Trauma. 2007 Jan; 62(1): 212-215.

"We have noticed a decrease in the incidences of wound infection after using the wound protector at our trocar site."

Im A, et al. Infection Rates Using Protectors in Laparoscopic Gastric Bypass. SAGES Poster Session 2005.

"In this study the use of barrier wound protection in elective open colorectal resectional surgery resulted in a clinically significant reduction in incisional surgical site infections."

Valid till: 27/11/2022

GeM Availability Report and Past Transaction Summary

GeM Availability Report and past transaction summary report is generated based on the specifications searched by the Buyer. The specification may be modified appropriately for searching relevant categories on GeM. Buyer may navigate to GeM category page by clicking on the category link to view category specifications and products/services available in the category.

Order Count and Order Value displayed is on a cumulative basis since GeM inception.

1. Search String: WOUND RETRACTOR 2.5-6 CM S SIZE

Search type: Product

1. There are categories available on GeM matching your requirements (as listed here). You can create a bid on GeM with a product closest matching your required specifications and add additional parameters in specifications through Corrigendum using RMS functionality.
2. If you feel that category TP needs updating you can submit category updating request also through RMS.
3. If you do not want to use any of the above option and want to proceed for procurement outside GeM, please suggest the specifications of the required product for creation of new category on GeM for future procurement.

Search Result: Category available/suggested on GeM but marked as "not matching requirements" by the buyer with undertaking as under:

It is certified that I have thoroughly checked all probable categories suggested by GeM and I am satisfied that the product required is not covered / does not fall in any of the suggested categories and can not be procured under any of these categories even after inclusion of List of Values(LOV) wherever possible in category specifications of suggested categories. It is also certified that the technical specification requirement are such that these can not be covered even by adding specification parameters using ATC in any of the GeM suggested categories. This is a one-time requirement hence new category creation is not proposed / or requirement is recurring but request for new category creation will be submitted separately post generation of GeMARPTS.
