The availability of product is not guaranteed and may change due to the new IVDR.

We further confirm that there is no company that manufactures the same product with the same properties as defined for EUROIMMUN products. EUROIMMUN Medizinische Labordiagnostika AG has invented the BIOCHIP technology for IIFT allowing extreme miniaturization and standardization of immunobiochemical analysis. In the EUROLINE products, membrane strips are fixed as onto synthetic foil. Membranes are coated with thin parallel lines of several purified, biochemically characterized antigens are used as solid phase.

CPC Diagnostics Pvt Ltd is our authorized distributor for our product ranges in India.
